(See Illustration in Colors on Inside of Back Cover Page.)

Notwithstanding the great number of varieties of roses already introduced, hybridization has, during the last few years, been more carefully studied than ever before and the results enable us to offer a collection of fancy roses which will stand without equal. The average garden enthusiast nurses the delusion that roses run pretty much alike in color while the fact is that it is not difficult to make up the most attractive collection and from which the common rose color would be entirely excluded. It is the color of a rose that makes its appeal universal. The roses of this collection are celebrated for their extreme delicacy of coloring and delicious fragrance. As supplying the various shades of yellow wanting among roses of the past, they will be found particularly attractive, and their hardiness and vigor will lead to extended culture. Lovers of roses should give special attention to this new class and place their orders early in the season.

MOST THE NEW ROSES DESIRABLE

Introductions of Various Prominent European and American Rose Specialists.

The best bloomers for the yard and garden are included in these newer roses of all kinds. offered are of unusual value, most of them having been selected while growing and blooming in Europe the past season. Just as rose growers in America have come to recognize the essentials that must be present in a novelty, so in Europe these same characteristics are being bred into the seedling, and it is with confidence that we recommend the following magnificent varieties. The number of new varieties of roses introduced from all parts of the world will average about one hundred per year. After a thorough test, usually from five to ten sorts each year will come up to the mark as being worthy of cultivation. The roses listed here are not untried, having passed the most severe tests, and are offered as gold medal varieties; and though, as with all roses, some are of growth and habit such as to make them adapted to certain sections of the country, generally speaking all will be found highly desirable.

[ARECHAL] The Famous ROSE

The fame of the superb yellow Rose Marechal Niel with its large, deep, goldenyellow flowers is world wide. It is almost universally held to be the finest Rose for indoors or outdoors, where the climate admits of its cultivation. In the North the plant should have careful protection in open ground during the winter. Its magnificent golden-yellow flowers are almost massive in dimensions, and reports from Southern California growers tell of single plants showing one to two thousand blooms at a time. It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, an extremely free bloomer and flowers throughout the season. FIVE GRAND HERMOSA ROSES

White Hermosa

"We counted on one plant 143 buds and flowers."

This is a lovely white Rose, a pure Tea, but a foreign seedling; the freest flowering white rose we have seen. For a pot plant it cannot be excelled as it possesses every good quality of a pot Rose. We counted on one plant 143 buds and flowers, and the plant was only nine months old. Try it. Price, 10 cents each, 3 for 25 cents, 12 for 90 cents; two-year plants 25 cents each, 3 for 65 cents, 12 for \$2.50.

Yellow Hermosa

No Rose like it for freedom of bloom. It is a fine grower and carries numbers of flowers on every shoot. A fine yellow Rose, large, not at all formal, but very attractive. Dr. W. Van Fleet stands at the very head of the climbing roses. Nothing like it has ever before been produced. Its parents are the lovely sea-shell pink rose. Souvenir de Pres. Carnot, and the fast-growing, climbing or trailing, pure white memorial rose, Rosa Wichuraiana. The flowers, when open, run four inches and over in diameter—borne constantly from the time the sun shines in the spring until late in the autumn. The color is a very delicate shade of flesh-pink on the outer surface, deepening to rosy flesh in the center. The flowers are full and double, delicately perfumed. OSES

This is not an ordinary Climbing Rose, but is a vigorous, rampant, climbing type of the real American Beauty, with its gorgeous flowers and its surpassing fragrance. Immense blooms measuring 3 to 4 inches in diameter; and each one is invariably produced on a separate stem. The color is glowing crimson-red, the real American Beauty color. The foliage is magnificent and is an important feature in climbing Roses, for without healthy, leathery foliage, any climbing Rose is a failure, because it is unsightly. Absolutely hardy in all localities, withstanding a temperature of 10 to 25 degrees below zero, and is equally satisfactory in warmer Southern climates. Price, 25c each, 3 for 65c, postpaid; 2-year size, 50c each, 3 for \$1.30.

REMARKABLE CLIMBING ROSE Silver Moon

This Rose is one of the first among Climbing Roses. The flowers run four and one-half inches and over in diameter, clear silvery white in color, petals of great substance and beautifully couped. The center is filled with bright yellow stamens, a very attractive feature. It is very floriferous, the plants literally covering them-selves with great clematis-like flowers. They are borne on strong stems, twelve to eighteen inches long, and are delicately fragrant. The foliage is large and abundant, a pleasing shade of bronze-green, glossy and immune from mildew. Price, 30c each, 3 for 80c, postpaid; strong 2-year plants, 45c each, 3 for \$1.20.

THE REDDEST OF ALL RED ROSES

Souvenir de Wooton

An American variety of great promise, with the following good qualities: (1) Color velvety-red, equal to the Jacqueminot; (2) perfume which cannot be excelled; (3) continuous flowering qualities; (4) the most prolific bloomer in existence, every shoot containing a flower bud; (5) habit exceedingly vigorous, and in foliage quite equal to the American Beauty; (6) it never makes imperfect buds, and dark weather but deepens the color, giving it a richer shade of crimson; (7) it is a full double Rose, and is good in bud, half open, or fully expanded. Full open flowers frequently are six inches in diameter. Price, 15 cents each; large plants, 35 cents each.

Etoile de France

General McArthur

HARDY HYBRID PERPETUAL ROSES

(June Roses.) There is little question that June Roses are the most valuable of all hardy plants. They are of vigorous, upright growth, have large, bold flowers, frequently measuring 5 to 6 inches in diameter, and are deliciously fragrant. These roses will succeed in any locality and are so hardy that they will live through the severest winters with but a light protection of leaves or coarse manure. All bloom freely at the usual time, early in the season, and some varieties, like Mme. Masson and Mme. Charles Wood, continue to bloom from time to time during the summer and autumn.

The New Hardy Variegated Rose, Roger Lamberlin •

One of the most remarkable Roses yet offered. The petals are irregular on the edges like a double Petunia; the color is glowing crimson throughout, except the edges of the petals, which are distinctly marked with a white band, forming a sharp contrast and the most unique combination of colors known in Roses. The growth is free and vigorous, and the fragrance is delightful, equal to the finest of the hardy Roses. This is a "novelty" of the most striking order. Price, 20c each; 3 for 50c; large two-year-old, 40c; 3 for \$1.00.

Madame Masson

Blooms all the time; the flowers are large, full and delightfully perfumed; color bright, rich crimson; it is a robust, sturdy grower. 15c ea; 3 for 40c, postpaid; 2-year size, 35c ea; 3 for \$1.00.

Strong 1-year-old plants, own roots, 15c each; 6 for 85c; 12 for \$1.50; 2-year-old heavy plants, 40c each; 6 for \$2.00; 12 for \$3.75.

Deep, shining rose, very fresh and pretty. It is, moreover, a good, strong grower, with nice, almost thornless stems, which often attain six to seven feet in a single season. 15c each; 3 for 40c; large 2-year-old plants, 35c each; 3 for \$1.00.

Black Prince

Snow White Hardy Rose FRAU KARL DRUSCHKI

(White American Beauty) This magnificent variety has taken first prize at all the great flower shows of Europe. Makes splendid buds and immense flowers four to five inches across; perfectly double and delightfully fragrant; large, thick petals, very durable and handsome. Bright, shining green leaves, elegantly veined; a healthy, vigorous grower, entirely hardy, and a constant and abundant bloomer. Recommended as the most beautiful and satisfactory snow-white hardy perpetual Rose. 1-year plants, 20c ea.; 3 for 50c, postpaid; 2-year size, 40c.

The Peony Rose, Clio

Raised by Wm. Paul & Sons, the celebrated English Rose growers, and was awarded two first-class certificates by the Royal Horticultural Society. Flowers very large, color flesh, shaded in center to rosy-pink. Its perfect hardiness, vigorous growth and freedom of bloom make it most valuable for planting in the Rose gardens, while the large size, exquisite color and delicious fragrance of its flowers—which at perfection are as large as Peonies—make it desirable as a cut-flower Rose. Strong 1-year-old plants, own roots, 20c ea; 3 for 50c; 6 for \$1.00; \$1.75 per dozen; 2-year-old heavy plants, 40c ea; 6 for \$2.60; \$3.75 per dozen.

Madam Chas. Wood

We quote the introducer's description: "For years we have been looking for a variety which had all the desirable qualities of a bedding Rose-i. e., one which was of good color, fine form, a profuse bloomer, and which would stand the rigor of our Northern Winters without protection; and we can conscientiously say, that until the Md. Chas. Wood was produced there was none, to our knowledge, which combined all these qualities. It is a vigorous, healthy Rose, of dwarf, branching

habit, and is simply loaded with flowers all Summer long, being even more profuse that most of the tender 'ever-blooming' Roses. The flowers are large, perfectly double, and of a dazzling scarlet-crimson color, and have the rich, spicy fragrance peculiar to the best Hybrid Roses." Price, 20 cents each; 3 for 50c; large two-year-old plants, 40 cents each; 3 for \$1.00.

Anna de Diesbach

(Glory of Paris.) Brilliant pink, sometimes shaded with bright maroon; long, pointed buds and large, finely formed compact flowers, very full and sweet. One of the best. 15c ea; 3 for 40c; large 2-year-old plants, 30c ea; 3 for 80c.

The Distinctly Striped Novel and Showy ROSE VICK'S CAPRICE

Striped Rose, Vick's Caprice, 20c.

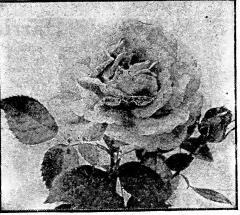

This grand novelty is a true Hybrid Perpetual Rose. We esteem this one of its greatest advantages, as it may be grown to perfection by the amateur equally as well as by the professional florist. The flowers are large, ground color soft, satiny pink, distinctly striped and dashed with carmine. It is beautiful in the bud form, being quite long and pointed, also showing the stripes and markings to great advantage, making a valuable and desirable article for cutting. 20c ea.; 3 for 50c; large 2-year-old plants, 40c ea.; 3 for \$1.00.

New Hardy Rose, MARGARET DICKSON

This magnificent new white Hybrid Perpetual Rose is unquestionably the greatest acquisition made in Roses for the past ten years. Some idea of its beauty and worth can be formed from the fact that wherever it has been exhibited in Great Britain it has carried off first honors, receiving in one year the Gold Medal of the National Rose Society of New England and six first-class certificates. No other Rose has ever received so many certificates of merit in a single year. The color is white with pale flesh center, petals very large shell shape, and of immense substance. The flowers are of magnificent form, produced single on long, stiff stems, are very double, and have the true magno!ia fragrance. The habit of growth is vigorous, with large and luxuriant foliage. Price, 20c; 3 for 50c; 2-year-old plants, 40c; 3 for \$1.00.

Magna Charta

A wonderfully strong and upright grower, exceedingly vigorous, with splendid and heavy dark bronze-green foliage. The glory of the plant is in its flowers, however, as they are extraordinary in size, full and double, wonderfully fragrant, of great depth, and borne freely from the first year, on long stiff stems. Color, clear rosy-red, beautifully flushed with velvet-crimson. This Rose has proven hardy, even in Canada, and a genuine treat is in store for everyone who plants it. A sure and profuse bloomer. Price, strong one-year-old plants, 20c each; 3 for 50c; two-year-old, 40c each, 3 for \$1.00.

Giant of Battles

In this hardy Rose the color is a most intense, glowing red; makes the curling, velvety petals fascinating beyond description. The flowers are very large, perfectly double, and freely borne on long, strong stems, which point gives them a superb prominence, either growing on the bushes or cut for decorative purposes. The habit of growth is vigorous and upright, with particularly handsome and massive foliage. 15c, 3 for 40c; strong 2-year plants, 40c; 3 for

New Hardy Rose Gloire de Lyonaise

It can not be called deep yellow, but rather a pale shade of chamois or salmon-yellow, deepest at center, sometimes passing to a rich, creamy-white, finely tinted orange and fawn. Price, 20 cents each; 3 for 50 cents; large two-year-old plants, 40 cents each; 3 for \$1.00.

Ulrich Brunner

This is by a great many considered the finest red Rose in existence. Color, brilliant cherry-red. This variety is a seedling of Paul Neyron, from which it derives its immense size. BEAUTIFUL DECORATIVE FERNS

THE BEST FOR HOME AND PORCH DECORATIONS

These beautiful plants for home decoration vie with the Rubber plants for first place in the esteem of flower lovers.

They are finely cut and oddly shaped. Fronds have a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years.

THE BEAUTIFUL OSTRICH PLUME FERN (Elegantissima Improved)

The Most Notable and Valuable Novelty Introduced in Many Years.

Probably never in the history of horticulture has a plant been introduced that has received the universal admiration and praise that has been accorded this rare novelty. The popular Boston Fern has had the most phenomenal sale of any decorative plant that has ever been grown. This new variety is so far ahead of the Boston Fern that there is positively no comparison to be made. The character of its fronds is actually shown in the accompanying illustration, which is from a pho-

in the accompanying illustration, which is from a photograph and therefore a true picture. The effect in not unlike the graceful ostrich plume, hence the name which has been so appropriately given. The fronds grow very broad and heavy, often measuring six inches or more across, and five or six feet long. Owing to the weight of the foliage, the plant as-

broad and heavy, often measuring six inches or more across, and five or six feet long. Owing to the weight of the foliage, the plant assumes an exceedingly massive yet graceful appearance, and owing to the small plants make much more symmetrical and beautiful plants than the popular Boston Fern. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly, overlapping each other and showing two shades of green, the ends being a light green, while the center and main part of the frond is is rich dark green, the contrast producing a beautiful effect.

It is wonderfully valuable, not only on account of its beauty, but also on account of its ease in culture, hardiness and general adaptability. It has all the free-growing, hardy characteristics of the Boston Fern, and, like that plant, is equally suitable for house culture and a much more beautiful plant for greenhouse and conservatory decoration; in fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable plant than the Boston Fern. Everyone

who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Elegantissima Improved in cultivation." In decorative effect it so far outdistances the original variety (the Boston Fern) that there is positively no comparison to be made. We consider it The Most Valuable Novelty That Has Been In-

able Novelty That Has Been Introduced in Many Years, in the New Plume Decorative Ferns. We offer well established plants at 20 cents each, 3 for 50 cents, postpaid; strong plants, 30 cents each, 3 for 80 cents, postpaid; larger plants 40 cents each, 3 for \$1.10 postpaid; extra strong plants 50 cents each, 3 for \$1.25. Specimen plants 75 cents each, 3 for \$2.00. (The largest sizes of these Decorative Ferns should be sent by express.)

The McGregor Bros. Co., Springfield, Ohio, U. S. A.—Received Ferns today. I have dealt with every reputable Florist in the United States, but I have never received such splendid, large, thrifty plants packed in such excellent shape.

The Original Boston Fern

(Nephrolepis Exaltata Bostoniensis)

This popular Fern has proven a most valuable decorative plant. It is a rapid grower of very easy culture, soon forming a large, graceful plant; its beautiful fronds often attaining a length of 5 to 6 feet, which arch and droop gracefully. No plant ever introduced has had a larger sale than the popular "Boston Fern." It is still in large demand. You can make no mistake in ordering a "Boston Fern."

Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each, postpaid.

The Springfield Fern

A valuable Fern, especially for vases, baskets, and box work, of very erect growth, the fronds more stiff than the Boston, and similar to the Piersonii Fern. It is a vigorous growing variety, and we believe will prove very popular. Price, nice young plants, 15 cents each; strong plants, 35 and 50 cents.

The Newport Parlof Fern

(Nephrolepis Scotti.) It is a condensed form of the Boston Fern with characteristics not evident in the parent, an average plant in an 8-inch pot having 200 fronds. The fronds average about twenty inches and three inches in width at the widest point, being more finished than the parent. Price, nice young plants, 15 cents each; larger size, 25 and 50 cents.

New Plumed Fern, Piersoni

An entirely new form of Boston Fern. The pinnae subdivide, making miniature fronds which are superimposed on the main fronds, looking as if two or even three were condensed in one. They are graceful, feathery, plumy, nothing describes them better than "Ostrich Plumes." Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each.

The Plumed Scotti Fern

The Boston Fern, 10c, 25c and 50c.

(Nephrolepis Scholzeli)

The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all of the merits of that most popular variety, but with the pinnae subdivided, giving it an airy, feathery appearance. Price, nicely shaped plants 15 cents; larger sizes 30 and 75 cents, postpaid.

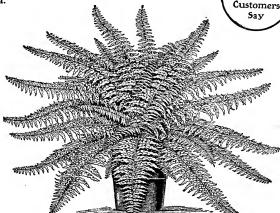

The Fish Tail Fern

Entirely distinct. Throughout the South takes precedence over all others. Leaves formed to resemble a fish tail; very effective. Grand for house culture. 20c ea.

The New Fern.

"Roosevelt"

Introduced as "The Greatest Fern of the Age."—In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First, it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended. Fine voung excellence over that vamended. Fine young plants, 20 and 35 cents; stronger plants, cents, postpaid; strong specimen plants, 75 cents each, by express only.

Roosevelt Fern, 20c, 35c, 50c and 75c.

SPECIAL OFFER.—4B371. We will send postpaid six Ferns which we will select from this and the preceding page, in the small sizes, for 85 cents, postpaid; and the same number (six in all) of the larger sizes for \$2.00. (Should be sent by express.)

Hardy Ferns For Shady Places

These graceful and universally popular plants are of easy culture and afford a wide range of possibilities. A shady nook, where the soil is moist and the drainage good, will prove an ideal location, especially if a liberal amount of leaf mold or woods earth is available; and better still if rocks and stumps may unite in breaking the monotony of the ground's surface. Under such conditions Ferns require very little attention and amply repay in satisfaction and ge nu in e pleasure. There are many places more or less shut out from the sunlight that may be converted into veritable beauty spots by clumps of Ferns of various kinds, and their intrinsic ornamental qualities are well worthy of our attention. Price, 25 cents each; 3 for 70 cents; 6 for \$1.35; \$2.50 per dozen, by express only.

The Ostrich Plume Palm

Under the natural order of Palms, we find the finest of decorative, as well as many of the most useful plants known. In ancient history, no plant or tree is spoken of so much as the Palm, and today as a highly ornamental and wonderfully useful plant it stands without a rival. Their symmetrical, well-branched trunks, producing a spreading canopy of cut-leaved or fan-like foliage, distinguish them from nearly all other forms of vegetation. canopy of cut-leaved or fan-like foliage, distinguish them from nearly all other forms of vegetation. All members of this family are essentially tropical in their habits, are highly ornamental in appearance, and many of them in different ways of commercial value. A new Palm is always interesting, but when the new variety is without doubt the most graceful and also the hardiest, there is nothing to prevent it becoming immensely popular. The Horticultural World has become enthused over the new beautiful Palm Phoenix Roebelini. It has the grace and lightness of the beautiful Cocos Weddeliana, but is much more robust in growth with ten times the foliage. The plant forms graceful, recurved and spreading foliage from the ground up. The foliage of Palms is of two kinds—fanveined leaves, in which the venation radiates from a common center, and the feather-veined, in which the veins run out from the sides of a long mid-rib. Phoenix Roebelini is of the latter type, as our illustration shows. This new variety is one of the easiest of all plants to manage, and if given proper treatment will make a rapid growth, small plants soon growing into specimens like our illustration, notwithstanding the fact that all Palms are generally called very slow growing plants. As a foliage plant, it cannot be excelled, withstanding wonderfully dust, changes in atmosphere and neglect. Do not expect any Palm, however, to take care of itself, as it should have regular attention. The leaflet offered below will give you full instructions. Do not expect any Palm, how will give you full instructions.

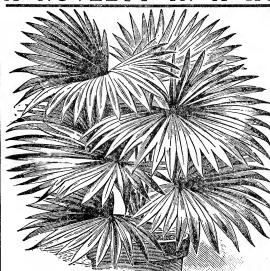

We offer a fine lot of plants of this beautiful Ostrich Plume Palm, Phoenix Roebelini, as follows: Nice young plants, 50c and 75c each. Larger specimens, \$1.25, \$2.00, \$2.50 and \$3.00 each, by express only.

Large Leaved Rex or Painted Leaf Begonias

the great beauty of their foliage, which is large and beautifully variegated a peculiar silvery-metallic gloss. They make excellent pot plants, and are

shady corners. We make a specialty of this marvelous family

sharp sand. They like a moist, warm atmosphere, and should be kept shaded during the summer. Do not allow the sun to strike the leaves when wet, and do not overwater the plants.

Louise Closson, 20c LOUISE CLOSSON

One of the richest and most beautiful of the Rex family. The coloring is simply magnificent, center of leaf deep bronze with broad band of silvery-rose, edged bronze, giving the whole a purplish tint. The oddest color of all the Rex. Price, 20 cents each; three for 50 cents.

REX BEGONIA, LOUIS CHRETIEN

Louis Chretien made a decided sensation among Begonia growers a few years ago. The zone of rosy heliotrope is broad and very highly colored, the habit and freedom of growth exceptionally good, while the metallic luster is very bright. Begonia lovers looking for a first-class novelty to add to their collections will find this variety extra fine in every particular. Price, 25 cents each; 3 for 60 cents.

BEGONIA RUTH FINDLAY

One of the most distinct and striking of all Rex Begonias, and one of the easiest to grow. The plant is of bushy habit, and the leaves are of fair size—most of the leaf being a silver color spotted and streaked with dark green on the edges. This variety bears the metallic luster of other Begonias, and, at the same time, shows the coral-red effect when the light shines through the leaves. Our illustration gives an excellent idea of its character of growth, although being a greatly minimized illustration gives a faint idea of the true size of the foliage. Price, 15 cents each; 3 for 50 cents.

KING OF REX

One of the most effective of its class, though the oldest variety. Of a beautiful metallic luster, center and edge a soft velvety green with a broad silver zone terminating at the point. The foliage of this Begonia on well-grown specimens is so massive and the growth so majestic as to awe the beholder. Indeed, we doubt if we have a handsomer plant than this. It is of the very easiest culture. Anyone can succeed with it. Price, 20c each; three for 50c. three for 50c.

Chrysanthemums are of Japanese and Chinese origin. Through the enterprise of American growers, who have given them time and devotion, they have, as if by magic, so developed as to give them the unquestioned title of "Queen of Autumn Flowers." For massive blooms, grandeur of color, ease of culture and certainty of flower, either in the open ground or in pots, there are no plants that will surpass them, and but few their equal. The endeavor of nearly all growers has been, in ate years, to introduce varieties which will produce the largest and finest blooms for exhibition purposes, and it is of these varieties that our list is made up. Every sort we offer, if well grown, should prove a prize winner.

The colored plate of Fuchsias, Petunias, Begonias and Phlox offers a collection of constant blooming plants, rich and gorgeous, yet soft in coloring; varieties of marvelous beauty for the yard and garden. The 20 sorts offered make some of the choicest collections that will be of-

fered this season. They represent wonderful improvements in size, color and beauty of flowers. All are prolific bloomers; vigorous in habit of growth; and, in fact, so easy to grow that all persons should succeed with them.

McGregor's Constant Blooming HIBISCUS

Hibiscus are of great merit in that they bloom constantly and they have added value of being especially adapted for house plants, blooming just as well indoors as out. Hibiscus permit of being trimmed into large bushy plants or standards and after the first year, make fine specimens which can be kept and used in this manner for several seasons. They can be stored in a protected place where such plants as Hydrangeas, Oleanders, etc., are wintered or can be kept growing through the winter. The collection we offer gives a grand variety of color and makes up a collection of the best varieties offered.

For outdoor decoration or for house culture there are few plants which are as effective as the Petunia. They begin to flower early and continue to be a mass of bloom throughout the summer season and up until they are killed by the frost. They are deaily cultivated, simply requiring a good soil and sunny location. After devoting a great deal of time on Petunias, we have succeeded in getting the finest strain or est that we have ever offered. Unsurpassed in brilliancy of colors and the size of the flowers. They include all the fightest shades of plink, purple, rose, white, crimson, etc. They have been carefully selected and the most of them are beautifully fringed.

From the first opening flower until frost arrives, they are a brilliant setting for any garden. The bulbs we offer are grown by an eminent European bulb specialist, and are all first size blooming tubers, true to colors and markings, and we guarantee that our customers will be fully satisfied with the results from plantings.

A Glorified Aster

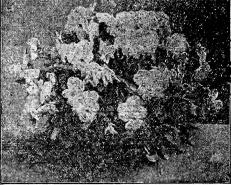

This new and distinct Aster grows to a height of 18 to 24 inches, and yields ten or more flowers to each plant, on long, upright stems. The blooms are truly wonderful, being more like immense Chrysanthemums than the usual Asters—hence the name. The form of the flowers is like the long-petaled, fluffy Comet Aster, but is fuller in the center and very much larger, with a curl in the petals seen only in the newer Chrysanthemums. The three colors are unsurpassed. The lavender is clear and most brilliant, the pink is the color of a LaFrance Rose, the white is like driven snow. Our seed is grown by the introducer of this grand novelty. The Astermum received highest honors at the Florists' Convention for 1912, and was spoken of as a phenomenal flower by the florists in attendance. Offered now for the first time to flower lovers. McGREGOR'S SELECTED FLOWER SEEDS

We have used the greatest care in obtaining our Flower Seed, and those we offer are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seeds planted may be attributed to the manner in which the seed is sown rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes, in good garden soil. Cover seeds very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be taken in watering seedlings well after planting and to protect from the sun for a few days with light paper.

Perennials continue to flower several years in succession. Many of them bloom the first year if sown early.

STRAWBERRIES The Best Fruit That Grows

All varieties offered in this list have perfect or bi-sexual All varieties offered in this list have perfect or bi-sexual blossoms, except those marked (P), which are destitute of stamens and are termed pistillate or imperfect flowering varieties and must be planted near some perfect-flowering sort or they will produce little or no fruit. We advise fall planting for the best results. Dip the roots of the plants in water as soon as received, and bury the roots in moist, shady ground till you are ready to set them out. Do not wet the tops or you will rot the plants. Neglect for an hour or so is often fatal.
